1. The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach or fairly suggest a multiplexer selecting one of a generated clock and a gated generated clock as a double clock in accordance with a halt multiplexer control, wherein the double clock has a frequency twice that of a reference clock, a halt circuit controlling the halt multiplexer control to selected the gated generated clock when the alignment signal matches a pre-determined clock level, wherein the halt multiplexer control is clocked by the generated clock as called for in claims 1, 8 and 16. Therefore, claims 1-20 are presently allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
